# Andrei Scripcaru

Software Engineer

Chișinău, Moldova

## Summary

Software engineer with 13 years designing and delivering complete systems. I work across the full stack — architecture, backend, frontend, infrastructure — and focus on shipping software that solves the actual problem.

## Experience

FinancialDocs

Full Stack Engineer

May 2025 - January 2026 (9 months)

- Maintained three legacy paystub platforms ([thepaystubs.com](https://thepaystubs.com), [paystubs.net](https://paystubs.net), [paystubcreator.com](https://paystubcreator.com)) serving hundreds of users, evolving a shared codebase of 2,000+ service classes without breaking production

- Architected a legal document platform ([legaldocs.com](https://legaldocs.com)) — designed the CMS data model with 14 collections, built the document generation pipeline, and integrated dual payment providers

- Designed a webhook-based caching system with CDN integration to handle content updates across interconnected documents

- Delivered entirely using agentic AI workflows

NIXAP

Software Engineer

April 2024 - April 2025 (1 year 1 month)

Chișinău, Moldova

Full-cycle development for:

- a multi-service and multi-tenant VoIP system
- a tracking system for carriers, dispatch, and truck drivers
- a food delivery interface

Starlab Zone

Full Stack Engineer

February 2024 - June 2024 (5 months)

Development for a social-media streaming service.

crawless

Full Stack Developer

August 2023 - February 2024 (7 months)

- Development of web automation programs using proprietary software.
- Heavy use of third-party services to aid in automation, such as captcha resolution.
- Estimation and concept creation for prospects.
- Database, back-end, front-end development, and testing for an in-house CRM.

D42.tech

Full Stack Engineer

November 2022 - August 2023 (10 months)

- Back-end, front-end, and API development using GraphQL, Node microservices, and React.
- Real-time notifications, messaging, and queue based systems.
- Integration with AWS services and proprietary truck hardware.
- QA, integration, and end-to-end testing.

Deditech Com

Full-stack Developer

August 2022 - November 2022 (4 months)

- In-house CRM back-end and front-end development for a UK based audit company.
- Leading development from scratch of a web application for a home renting business.
- Direct daily interaction with the clients and stakeholders.
- Responsibility for database integrity and availability in the financial area.

eToro

Back End Developer

June 2022 - August 2022 (3 months)

- Leading back-end development including REST API for an iOS app.
- Daily communication and planning with the client.
- QA and integration testing.

**MKM Building Supplies**

Full Stack Developer

March 2022 - May 2022 (3 months)

- Back-end and front-end development for an e-commerce platform.
- Integration with existing headless CRM via API and payment services.
- Integration and end-to-end testing.
- Temporary relocation to Bulgaria and direct communication with the client.

**GoodLeap**

Back End Developer

December 2021 - February 2022 (3 months)

- Back-end development of existing microservices based on Node and AWS.
- Heavy integration with third-party services such as DocuSign.
- Structured communication and planning with per-service based teams.
- Following and writing niche related documentation in written and video format.

**RentInsider**

Frontend Web Developer

June 2021 - October 2021 (5 months)

- Leading front-end development for the web UI from scratch.
- Integration with an existing Python REST API.
- Integration and end-to-end testing.
- Implementation of an existing Figma design.

**Virail**

Full Stack Developer

April 2021 - June 2021 (3 months)

- Back-end and front-end development for an existing web application.
- Integration with Elasticsearch for fast and optimized results during high loads.
- QA and end-to-end testing.

**Deutsche Fintech Solutions GmbH**

Frontend Engineer

December 2020 - April 2021 (5 months)

- Front-end development for an existing web application via React, GraphQL, and TypeScript.
- Leading development and management in the transition from former UI pattern into micro-frontend pattern using Luigi framework and React.
- Solid interaction and planning with the client and stakeholders.
- QA and end-to-end testing.

Travod

Full Stack Engineer

April 2019 - October 2020 (1 year 7 months)

- Back-end and front-end development for the existing CRM using Ruby-on-Rails.
- Leading development for a GraphQL API based on existing back-end code and a new version of the UI of the CRM using Vue and Nuxt that integrates with the existing back-end via API.
- Integration with third-party services for development and monitoring.
- QA, integration, and end-to-end testing.
